Greetings!

We would like to introduce **ClassIn**, an all-in-one digital learning platform designed to support schools, divisions, and education systems in delivering engaging, efficient, and future-ready learning experiences.

ClassIn is currently used by educational institutions and government education programs worldwide, providing a comprehensive ecosystem for teaching, learning, assessment, collaboration, and school management. The platform combines virtual classrooms, learning management, AI-powered teaching tools, student engagement analytics, and digital resource management into a single integrated solution.

For Philippine public education, ClassIn can support key initiatives such as:

- Digital and blended learning implementation
- Teacher productivity and professional development
- Student engagement and learning analytics
- Learning continuity during disruptions and emergencies
- Centralized management of teaching and learning resources
- Division-wide and school-wide digital transformation programs
- Future-ready AI-enabled teaching and learning environments

As the Department of Education continues to strengthen its digital education agenda, we believe ClassIn can serve as a strategic partner in helping schools and divisions enhance teaching quality, improve learning outcomes, and maximize investments in educational technology.

We would be honored to schedule a brief meeting or presentation at your most convenient time to demonstrate how ClassIn can support your current programs and priorities. Our team would be pleased to discuss possible use cases, pilot implementations, and partnership opportunities tailored to your specific needs.

Book a meeting here - <https://forms.gle/5PLhsKgKaXtKktRc9>

Please let us know a suitable date and time, and we will gladly adjust to your schedule.

Thank you for your time and consideration. We look forward to the opportunity to connect and explore how ClassIn can contribute to advancing public education in the Philippines.

Regards,

Kerwin J. Presiados
